Melodion & Harmonica

**Warm colors and design, hard-to-break reeds, durable case.
Our idea for children to use it with peace of mind is in its original form.**

Secret of mouthpiece

The short mouthpiece has an ideal shape that allows users to blow air to reeds straight. The round shape makes it easy to play double tonguing and tremolo.

The O-ring also resolves air leaks during performance. It is easy to put on and pull from Melodion.

Reed is heart of Melodion

The reed inside is the heart of Melodion. The reed is made of special phosphor bronze that is hard to break and rust. It keeps an exact pitch, which was fully automatically tuned by the computer.
